the print is done, the filing has changed. To start with, Supreme Court workers would be allowed one fifth of a sick leave day per week.

They'd also be eligible for an incentive program to encourage them to take vacation days. A little known fact is that 90% of Supreme Court employees work in the Clerk's Office. We are already developing a next generation policy with updated sick leave and vacation days and a progressive incentive program to ensure all will be able to care for themselves and their families during this time.

Please join us in thanking the Service Employees International Union for their support to a women's workforce and thanking the governor for creating an opportunity for us to discuss and improve. Please share and repost! The Supreme Court is comprised of 175 employees, many of whom are women. And now they have taken the next step in ensuring that all of their employees can take sick leave, legally, on their dime. The Supreme Court has

## become the first courthouse in Oregon to adopt a sick leave policy. This policy will provide the women who work at the Court with a true benefit, and at the same time improve 0cc13bf012

To evaluate the prognostic value of emergency operation for hyperacute subarachnoid hemorrhage (HSAH). Seventy-one patients underwent an emergency operation within 4 hours after HSAH and were followed up for 2 weeks to 6 months (mean 2.2 +/- 1.2 months). The Glasgow Coma Scale (GCS) score, the Hunt-Hess (HH) scale of the preoperative condition and the clinical grade of Cerebrospinal Fluid (CSF) showed a prognostic value to evaluate the early therapeutic effect for HSAH. In the patients who did not survive,

the GCS score, the HH grade of the preoperative condition, the clinical grade of CSF and the preoperative cerebral computed tomography (CT) were also conducted to evaluate the preoperative condition. The operations performed included microanastomosis of cerebral artery in 12 cases, micro-anastomosis of intracranial artery with cerebral artery in 32 cases, shunt operation in 12 cases, bi-frontal decompression in 12 cases, craniotomy in 6 cases and subarachnoid hemorrhage clipping of cerebral arterio-venous malformation (AVM) in 3 cases. The mortality was significantly higher in the patients with GCS score of 4 and lower (P
